6　Summary
⑴　Classification of the products to be procured : 14
⑵　Nature and quantity of the products to be rent : Educational Computer System for The College of Policy and Planning Sciences 1 Set
⑶　Type of the procurement : Rent
⑷　Basic requirements of the procurement :
A　The computer system is procured for use in information-related classes in the College of Policy and Planning Sciences. The system also provides general information infrastructure for making reports, information searching, emails, and other purposes.
B　The system must have fundamental software for basic information related education to all the students in the college and various kinds of software for professional education. Thus, it must have the functions to manage the software licenses efficiently.
C　The systems contains the following :
a　Massive capacity disk system and back-up system
b　Mail servers, print servers, DNS servers, image distribution servers
c　Servers needed for managing the system
D　The system must have enough efficiency to ensure smooth operation when all the terminals are started and logged in at once in a class.
E　All the related undergraduate and graduate students must be identified by user IDs in this system. The authentication in this system must collaborate with University of Tsukuba Unified Authentication System.
F　The terminal must have enough ability for processing multimedia data, like audio, video and graphics.
G　The system images for the terminals must be managed in an integrated fashion. Furthermore, the system must have an ability to test the system change before the practice use, and to configure to set a special setting for a group of terminals. The system must have a function to manage multiple system images easily.
H　The system must be designed as power-saving and space-saving.
I　Since the system must operate 24 hours a day, the system supplier must organize the procedures responsible for prompt and perfect system maintenance to handle system failures. The system failures must not interfere with the classes.
J　The system must have high level security, especially for the threat on network.
K　In order to support courses, the new software required by some instructors can be installed at any time during the rental term.
L　The system supplier must sufficiently support the college during and after the system installation.
M　The system supplier must do data transition from the current system.
N　The system must have the functions and structures that can minimize the management／operation cost.
