Electricity to use in Muikamachi tunnel transformer substation, contract power : 103kW the estimated electricity consumption for the delivery period : 352,000kWh

Electricity to use in Yamato parking area transformer substation, contract power : 86kW the estimated electricity consumption for the delivery period : 236,000kWh

Electricity to use in Koide tunnel transformer substation, contract power : 154kW the estimated electricity consumption for the delivery period : 397,000kWh

Electricity to use in Koide interchange transformer substation, contract power : 117kW the estimated electricity consumption for the delivery period : 374,000kWh

Electricity to use in Horinouchi interchange transformer substation, contract power : 92kW the estimated electricity consumption for the delivery period : 371,000kWh

Electricity to use in Echigokawaguchi tunnel transformer substation, contract power : 81kW the estimated electricity consumption for the delivery period : 217,000kWh

Electricity to use in Echigokawaguchi interchange transformer substation, contract power : 69kW the estimated electricity consumption for the delivery period : 285,000kWh

⑤ Electricity to use in Sanjo Tsubame interchange transformer substation, contract power : 109kW the estimated electricity consumption for the delivery period : 391,000kWh

Electricity to use in Maki Katahigashi interchange transformer substation, contract power : 72kW the estimated electricity consumption for the delivery period : 316,000kWh

Electricity to use in Kurosaki parking area upline transformer substation, contract power : 180kW the estimated electricity consumption for the delivery period : 793,000kWh

Electricity to use in Kurosaki parking area downline transformer substation, contract power : 162kW the estimated electricity consumption for the delivery period : 695,000kWh

Electricity to use in Niigatanishidaiichi interchange transformer substation, contract power : 92kW the estimated electricity consumption for the delivery period : 362,000kWh

Electricity to use in Tsugawa interchange transformer substation, contract power : 78kW the estimated electricity consumption for the delivery period : 272,000kWh

Electricity to use in Yakiyama tunnel transformer substation, contract power : 184kW the estimated electricity consumption for the delivery period : 460,000kWh

Electricity to use in Mikawa interchange transformer substation, contract power : 59kW the estimated electricity consumption for the delivery period : 208,000kWh

Electricity to use in Nishiyama tunnel transformer substation, contract power : 180kW the estimated electricity consumption for the delivery period : 486,000kWh

Electricity to use in Komatsu tunnel transformer substation, contract power : 59kW the estimated electricity consumption for the delivery period : 99,000kWh

Electricity to use in Hoshusan tunnel transformer substation, contract power : 72kW the estimated electricity consumption for the delivery period : 139,000kWh

Electricity to use in Yasuda interchange transformer substation, contract power : 81kW the estimated electricity consumption for the delivery period : 257,000kWh

Electricity to use in Niitsu interchange transformer substation, contract power : 94kW the estimated electricity consumption for the delivery period : 279,000kWh

Electricity to use in Niigatachuo interchange transformer substation, contract power : 120kW the estimated electricity consumption for the delivery period : 497,000kWh

Electricity to use in Niigata airport interchange transformer substation, contract power : 70kW the estimated electricity consumptionfor the delivery period : 253,000kWh

Electricity to use in Toyosaka Niigatahigashiko interchange transformer substation, contract power : 78kW the estimated electricity consumption for the delivery period : 267,000kWh

Electricity to use in Seiro Shibata interchange transformer substation, contract power : 93kW the estimated electricity consumption for the delivery period : 271,000kWh

⑥ Electricity to use in Kakizaki tunnel transformer substation, contract power : 101kW the estimated electricity consumption for the delivery period : 281,000kWh

Electricity to use in Kouchi tunnel transformer substation, contract power : 118kW the estimated electricity consumption for the delivery period : 272,000kWh

Electricity to use in Kashiwazaki tunnel transformer substation, contract power : 134kW the estimated electricity consumption for the delivery period : 371,000kWh

Electricity to use in Kashiwazaki interchange transformer substation, contract power : 104kW the estimated electricity consumption for the delivery period : 271,000kWh

Electricity to use in Kariwa parking area transformer substation, contract power : 36kW the estimated electricity consumption for the delivery period : 111,000kWh

Electricity to use in Nishiyama interchange transformer substation, contract power : 81kW the estimated electricity consumption for the delivery period : 237,000kWh

Electricity to use in Shinjizo tunnel transformer substation, contract power : 109kW the estimated electricity consumption for the delivery period : 411,000kWh

Electricity to use in Nakanoshima Mitsuke interchange transformer substation, contract power : 132kW the estimated electricity consumption for the delivery period : 425,000kWh

Electricity to use in Sakae parkingarea, smart interchange transformer substation, contract power : 193kW the estimated electricity consumption for the delivery period : 773,000kWh

Electricity to use in Yamaya parkingarea transformer substation, contract power : 48kW the estimated electricity consumption for the delivery period : 117,000kWh

⑦ Electricity to use in Oyashirazu tunnel transformer substation, contract power : 272kW the estimated electricity consumption for the delivery period : 1,068,000kWh

Electricity to use in Oyashirazu interchange transformer substation, contract power : 59kW the estimated electricity consumption for the delivery period : 241,000kWh

Electricity to use in Iwaki tunnel transformer substation, contract power : 195kW the estimated electricity consumption for the delivery period : 702,000kWh

Electricity to use in Itoigawa interchange transformer substation, contract power : 142kW the estimated electricity consumption for the delivery period : 449,000kWh

Electricity to use in Hiraushi tunnel transformer substation, contract power : 111kW the estimated electricity consumption for the delivery period : 462,000kWh
