Electricity to use in Kitahiroshima interchange transformer substation, contract power : 182kW the estimated electricity consumption for the delivery period : 780,000kWh

Electricity to use in Wattsu parking area transformer substation, contract power : 349kW the estimated electricity consumption for the delivery period : 1,720,000kWh

Electricity to use in Chitoseeniwa junction transformer substation, contract power : 43kW the estimated electricity consumption for the delivery period : 120,000kWh

Electricity to use in Chitose interchange transformer substation, contract power : 96kW the estimated electricity consumption for the delivery period : 420,000kWh

Electricity to use in New Chitose Airport interchange transformer substation, contract power : 61kW the estimated electricity consumption for the delivery period : 200,000kWh

Electricity to use in Kariki interchange transformer substation, contract power : 50kW the estimated electricity consumption for the delivery period : 180,000kWh

Electricity to use in Fushiko interchange transformer substation, contract power : 41kW the estimated electricity consumption for the delivery period : 170,000kWh

Electricity to use in Sapporokita interchange second transformer substation, contract power : 57kW the estimated electricity consumption for the delivery period : 210,000kWh

Electricity to use in Sapporonishi interchange transformer substation, contract power : 81kW the estimated electricity consumption for the delivery period : 360,000kWh

Electricity to use in Teine interchange transformer substation, contract power : 35kW the estimated electricity consumption for the delivery period : 150,000kWh

Electricity to use in Zenibako interchange transformer substation, contract power : 83kW the estimated electricity consumption for the delivery period : 320,000kWh

Electricity to use in Hariusu tunnel transformer substation, contract power : 91kW the estimated electricity consumption for the delivery period : 330,000kWh

Electricity to use in Asari interchange transformer substation, contract power : 83kW the estimated electricity consumption for the delivery period : 360,000kWh

Electricity to use in Asari tunnel transformer substation, contract power : 116kW the estimated electricity consumption for the delivery period : 380,000kWh

Electricity to use in Wakatake tunnel transformer substation, contract power : 96kW the estimated electricity consumption for the delivery period : 260,000kWh

Electricity to use in Oiwakecho interchange transformer substation, contract power : 68kW the estimated electricity consumption for the delivery period : 280,000kWh

Electricity to use in Yubari tunnel transformer substation, contract power : 35kW the estimated electricity consumption for the delivery period : 100,000kWh

④ Electricity to use in Ebetsunishi interchange transformer substation, contract power : 103kW the estimated electricity consumption for the delivery period : 360,000kWh

Electricity to use in Nopporo parking area transformer substation, contract power : 46kW the estimated electricity consumption for the delivery period : 170,000kWh

Electricity to use in Ebetsuhigashi interchange transformer substation, contract power : 80kW the estimated electricity consumption for the delivery period : 350,000kWh

Electricity to use in Iwamizawa interchange transformer substation, contract power : 159kW the estimated electricity consumption for the delivery period : 720,000kWh

Electricity to use in Iwamizawa service area transformer substation, contract power : 193kW the estimated electricity consumption for the delivery period : 780,000kWh

Electricity to use in Mikasa interchange transformer substation, contract power : 67kW the estimated electricity consumption for the delivery period : 290,000kWh

Electricity to use in Koshunai tunnel transformer substation, contract power : 119kW the estimated electricity consumption for the delivery period : 320,000kWh

Electricity to use in Bibai tunnel transformer substation, contract power : 141kW the estimated electricity consumption for the delivery period : 590,000kWh

Electricity to use in Bibai interchange transformer substation, contract power : 80kW the estimated electricity consumption for the delivery period : 330,000kWh

Electricity to use in Chashinai parking area transformer substation, contract power : 59kW the estimated electricity consumption for the delivery period : 180,000kWh

⑤ Electricity to use in Naiesunakawa interchange transformer substation, contract power : 71kW the estimated electricity consumption for the delivery period : 300,000kWh

Electricity to use in Sunakawa service area transformer substation, contract power : 182kW the estimated electricity consumption for the delivery period : 1,030,000kWh

Electricity to use in Takikawa interchange transformer substation, contract power : 131kW the estimated electricity consumption for the delivery period : 560,000kWh

Electricity to use in Fukagawa junction transformer substation, contract power : 85kW the estimated electricity consumption for the delivery period : 350,000kWh

Electricity to use in Fukagawa interchange transformer substation, contract power : 81kW the estimated electricity consumption for the delivery period : 320,000kWh

Electricity to use in Tokiwaetanbetsu tunnel transformer substation, contract power : 350kW the estimated electricity consumption for the delivery period : 1,640,000kWh

Electricity to use in Arashiyama tunnel transformer substation, contract power : 134kW the estimated electricity consumption for the delivery period : 540,000kWh

Electricity to use in Asahikawatakasu interchange transformer substation, contract power : 153kW the estimated electricity consumption for the delivery period : 720,000kWh

Electricity to use in Asahikawakita interchange transformer substation, contract power : 72kW the estimated electricity consumption for the delivery period : 310,000kWh

Electricity to use in Wassamu interchange transformer substation, contract power : 75kW the estimated electricity consumption for the delivery period : 300,000kWh
