ARTICLE 8.47

Enabling use of network facilities and interconnection

1. The Parties recognise that enabling use of network facilities[1] and interconnection should in principle be agreed on the basis of commercial negotiation between the suppliers of public telecommunications transport networks or services concerned.

2. Each Party shall ensure that any supplier of public telecommunications transport networks or services in its territory has a right and, if requested by a supplier of public telecommunications transport networks or services of the other Party, an obligation to negotiate interconnection for the purpose of providing public telecommunications transport networks or services. Each Party shall provide its regulatory authority with the power to require, where necessary, a supplier of public telecommunications transport networks or services to provide interconnection with suppliers of public telecommunications transport networks or services of the other Party.

[1] For the purposes of this Article, "enabling use of network facilities" means the making available of facilities or services to another supplier of public telecommunications transport networks or services under defined conditions, for the purpose of providing public telecommunications transport services. It may include the use of active or passive network elements, associated facilities, virtual network services, co-location or other forms of associated facilities sharing, the use of leased circuits and the use of specified network facilities or elements, including the local loop, on an unbundled basis.

3. A Party shall not adopt or maintain any measure which obliges suppliers of public telecommunications transport networks or services enabling use of network facilities or providing interconnection to offer different terms and conditions to different suppliers for like services or imposes obligations that are not related to the services provided.

ARTICLE 8.48

Obligations relating to major suppliers

1. Each Party shall adopt or maintain appropriate measures for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices. These anti-competitive practices shall include in particular:

(a) engaging in anti-competitive cross-subsidisation;

(b) using information obtained from competitors with anti-competitive results; and

(c) not making available to other service suppliers on a timely basis technical information about essential facilities and commercially relevant information which is necessary for them in order to provide services.
