2. Each Party shall provide its regulatory authority with the power to require, where appropriate, that major suppliers in its territory accord to suppliers of public telecommunications transport networks or services of the other Party treatment no less favourable than that which the major supplier concerned accords in like circumstances to its subsidiaries or its affiliates, regarding:

(a) the availability, provisioning, rates or quality of like telecommunications services; and

(b) the availability of technical interfaces necessary for interconnection.

3. Each Party shall ensure that major suppliers in its territory provide interconnection with suppliers of public telecommunications transport networks or services of the other Party at any technically feasible point in the network of the major supplier concerned and that the major supplier concerned provides such interconnection:

(a) under terms, conditions (including with respect to technical standards, specifications, quality and maintenance) and rates which are non-discriminatory and no less favourable than those provided for its own like services under like circumstances, and of a quality no less favourable than that provided for its own like services, for like services of non-affiliated service suppliers, or for its subsidiaries or other affiliates;

(b) in a timely fashion, on terms, conditions (including with respect to technical standards, specifications, quality and maintenance) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the suppliers need not pay for network components or facilities that they do not require for the service to be provided; and

(c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

4. Each Party shall ensure that major suppliers in its territory provide suppliers of public telecommunications transport networks or services of the other Party with the opportunity to interconnect their facilities and equipment with those of a major supplier through:

(a) a reference interconnection offer or another standard interconnection offer containing the rates, terms and conditions that the major supplier offers generally to suppliers of public telecommunications transport networks or services; or

(b) the terms and conditions of an interconnection agreement in effect.

5. Each Party shall ensure that the procedures applicable for interconnection with major suppliers in its territory are made publicly available.
