(b) ensure technical quality of service; and

(c) safeguard efficient use of spectrum.

3. If a Party requires a licence, that Party shall make publicly available:

(a) all the licensing criteria and a reasonable period of time normally required to reach a decision on a licence; and

(b) the terms and conditions of individual licences.

4. Each Party shall notify an applicant of the outcome of its application without undue delay after a decision on the licence has been taken. In case a decision is taken to deny an application for or revoke a licence, each Party shall make known to the applicant, in principle in writing, upon request, the reasons for the denial or revocation. In that case, the applicant shall be able to have recourse to an appeal body as referred to in Article 8.54.

5. Each Party shall ensure that any administrative fees imposed on suppliers of telecommunications networks or services are objective, transparent and commensurate with the administrative costs of its regulatory authority. Those administrative fees do not include payments for rights to use scarce resources and mandated contributions to universal service provision.

ARTICLE 8.52

Allocation and use of scarce resources

1. Each Party shall carry out any procedures for the allocation and use of scarce resources related to telecommunications, including frequencies, numbers and rights of way, in an open, objective, timely, transparent, non-discriminatory and not unduly burdensome manner.

2. Each Party shall make publicly available the current state of allocated frequency bands, but shall not be required to provide detailed identification of frequencies allocated for specific government uses.

3. Measures by a Party allocating and assigning spectrum and managing frequency are not *per se* inconsistent with Articles 8.7 and 8.15. Accordingly, each Party retains the right to establish and apply spectrum and frequency management policies that have the effect of limiting the number of suppliers of public telecommunications transport services, provided that the Party does so in a manner consistent with the other provisions of this Agreement. That right includes the ability to allocate frequency bands, taking into account current and future needs and spectrum availability.
