(d) shall strive to promote trade and investment in goods that contribute to enhanced social conditions and environmentally sound practices, including goods that are the subject of labelling schemes, and recognise the contribution of other voluntary initiatives, including private ones, to sustainability; and

(e) shall encourage corporate social responsibility and exchange views and information on this matter through the Committee on Trade and Sustainable Development, and as appropriate through other fora. In this regard, the Parties recognise the importance of the relevant internationally recognised principles and guidelines, including the OECD Guidelines for Multinational Enterprises which are part of the OECD Declaration on International Investment and Multinational Enterprises adopted by the OECD on 21 June 1976 and the Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy adopted by the Governing Body of the International Labour Office in November 1977.

ARTICLE 16.6

Biological diversity

1. Each Party recognises the importance and the role of trade and investment in ensuring the conservation and sustainable use of biological diversity in accordance with relevant international agreements to which it is party, notably the Convention on Biological Diversity, done at Rio de Janeiro on 5 June 1992, and its protocols and the Convention on International Trade in Endangered Species of Wild Fauna and Flora, done at Washington D.C. on 3 March 1973 (hereinafter referred to as "CITES").

2. In that context, each Party shall:

(a) encourage the use of products which were obtained through sustainable use of natural resources and which contribute to the conservation and sustainable use of biodiversity, including through labelling schemes, taking into account the importance of trade in such products;

(b) implement effective measures, such as monitoring and enforcement measures, and awareness-raising actions, to combat illegal trade in endangered species of wild fauna and flora as listed in CITES, and as appropriate in other endangered species;
