Description:

In **DE** (applies also to the regional level of government): Rescue services and "qualified ambulance services" are organised and regulated by the Länder. Most Länder delegate competences in the field of rescue services to municipalities. Municipalities are allowed to give priority to not-for-profit operators. This applies equally to foreign as well as domestic service suppliers (CPC 931, 933). Ambulance services are subject to planning, permission and accreditation. Telemedicine may only be provided in the context of a primary treatment involving the prior physical presence of a doctor. The number of ICT (information and communications technology) service suppliers may be limited to guarantee interoperability, compatibility and necessary safety standards. This is applied in a non-discriminatory way.
