5　Summary
1）Details of Procurement
⑴　Classification of the products to be procured : 14, 71, 27
⑵　Nature and quantity of the product to be procured : Construction of shared server network infrastructure for broadcast-use information and file-based systems, and estimate of man-hours 1 set
⑶　Type of procurement : Purchase
⑷　Basic requirements of the procurement
①　On the occasion of the replacement of the current systems, a common infrastructure will be built to combine server and network hardware and run the software of the systems being changed.
②　The aggregated hardware will be expected to save space, reduce electrical power consumption and other costs, and provide a simplified structure, ready availability, high reliability, and high ease of maintenance.
③　The physical and virtual servers of the common infrastructure, and connecting networks between servers and external systems, shall be designed and constructed for full compatibility with the systems concerned.
④　The vendor of the design and construction of the common infrastructure shall set up the hardware according to the indicated functional and non-functional requirements of the systems concerned.
⑤　The vendor of the design and construction of the common infrastructure may also be requested to operate, service and perform maintenance-related management of the infrastructure.
⑥　Design and implementation of the common network security policy for the common infrastructure, and also network security policy for use when connecting the common infrastructure to external networks, shall be included.
⑦　The common infrastructure shall incorporate failover cluster instance etc. for the automatic recovery of servers and networks and continued operation of the systems concerned should any hardware malfunction compromise operation of those systems.
⑧　The common on-premises infrastructure shall have cloud connection to provide redundancy for all systems concerned and servers, facilitate scaling out and scaling in, and increase the resilience against failure and scalability of systems running on the infrastructure.
2）Submission of Materials and Comments
