3　説明書の交付　本公表に基づき応募する供給者に対して導入説明書を交付する。
⑴　交付期間　令和８年３月９日から令和８年４月20日まで。
⑵　交付場所　情報通信研究機構ホームページの調達情報よりダウンロードして入手すること。
4　説明会の開催　なし。
5　その他　この導入計画の詳細は導入説明書による。なお、本公表内容は予定であり、変更することがあり得る。
6　Summary
⑴　Classification of the products to be procured : 14
⑵　Nature and quantity of the products to be purchased : Rental of Computational Resources for Multimodal Multilingual Processing Technologies, 1 set
⑶　Type of the procurement : Rent
⑷　Basic requirements of the procurement : These computational resources shall include a deep learning computing system, a control system, a high-speed, highly reliable storage system, and a high-speed network
①　The deep learning computing system shall consist of 8 to 20 computing nodes, and each computing node shall be equipped with at least 2CPUs and at least 8GPGPUs
②　Each GPGPU in each computing node of the deep learning computing system shall have at least 141GB of ECC-enabled memory, at least 4.8TB／s of memory bandwidth, and at least 900GB／s of bi-directional GPU interconnect bandwidth
③　Theoretical computational performance of a single GPGPU shall be at least 67 TFLOPS in single-precision floating-point operations
④　Each computing node of the deep learning computing system shall have at least 1TB of main memory
⑤　The control system shall consist of one or more control servers and shall provide the functions necessary to manage the entire system, including login nodes and batch processing servers
⑥　The high-speed, high-reliability storage system shall provide an effective capacity of at least 1PiB, support a high-speed, high-reliability parallel file system, and be accessible at high speed from all servers
⑦　The high-speed network shall provide a bandwidth of at least 10Gbps and connect all servers and storage systems
⑧　The operating system shall be UNIX-compliant, and the deep learning computing system shall support batch processing
⑨　The deep learning computing system shall support programming languages such as FORTRAN, C, and C++, a parallel programming environment such as MPI, development tools, and various deep learning frameworks. The system shall also be programmable using common development tools such as CUDA
⑩　The system shall include hardware and software maintenance support, optimization support for existing programs, and development support for other software
