5. Each Party shall introduce and implement a system in which a power of attorney for application procedures or other administrative procedures on patents, utility models, industrial designs, or trademarks before the competent authority of the Party may relate to one or more applications and/or grants or registrations identified in the power of attorney or, subject to any exception indicated by the appointing person, to all existing and future applications and/or grants or registrations of that person.

6. The applications for and grants of patents and publications thereof shall be classified in accordance with the international patent classification system established under the Strasbourg Agreement Concerning the International Patent Classification of March 24, 1971, as amended. The applications for registrations of, and registrations of, trademarks for goods and services and publication thereof shall be classified in accordance with the international classification system of goods and services established under the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks, of June 15, 1957, as revised and amended.

7. Each Party shall endeavor to improve patent attorney system with a view to further facilitating acquisition and utilization of rights to patents, utility models, industrial designs and trademarks.

Article 84
Transparency

For the purposes of further promoting transparency in administration of intellectual property protection system, each Party shall, in accordance with its laws and regulations:

(a) take appropriate measures to publish information at least on applications for and grants of patents, registrations of utility models and industrial designs, registrations of trademarks and application therefor, and registration of new varieties of plants and application therefor;

(b) endeavor to make available to the interested parties official information contained in the dossiers in connection with matters provided for in paragraph (a);

(c) endeavor to make easily available to the public information on intellectual property protection system, including information on its efforts to provide effective enforcement of intellectual property rights.

Article 85
Promotion of Public Awareness Concerning Protection of Intellectual Property

The Parties shall take appropriate measures to enhance public awareness of protection of intellectual property including educational and dissemination projects on the use of intellectual property as well as on the enforcement of intellectual property rights.

Article 86
Patents

1. Each Party shall ensure that any application for a patent is not rejected solely on the ground that the subject matter claimed in the application is related to a computer program.

2. The provisions of paragraph 1 shall not prejudice the patentability of computer programs as such which shall be determined in accordance with the laws and regulations of each Party.

3. Each Party shall ensure that, if an invention claimed in the application for a patent is being worked by any person other than the applicant for the patent in that person's business after the publication of the application, that person or the applicant for the patent may file a request to the competent authority of the Party that the application be examined in advance of other applications, in accordance with its laws and regulations. In this case, the competent authority of the Party may require the applicant for the patent or the person who filed the request to furnish a proof that the invention is being worked, a result of prior art search in relation to the application, or a copy of the final decision by the administrative authority for patents of the other Party or of a non-Party on an application, which the applicant has filed in the other Party or in the non-Party, of an invention that is the same or substantially the same with the invention claimed in the application at issue. Where such a request has been filed, the competent authority of the Party shall take the request into consideration and endeavor to examine the application in advance of other applications, where appropriate.

4. Each Party shall ensure that a patent owner may file a request for correction of the description, the scope of the claims, or the drawings, that are attached to the application, to the administrative authority for patents for the purpose of restricting the scope of the claims.

Article 87
Industrial Designs

Each Party shall ensure adequate and effective protection of industrial designs in accordance with Articles 25 and 26 of the TRIPS Agreement.

Article 88
Trademarks
