6　Summary

⑴　Classification of the services to be procured : 71, 27

⑵　Nature and quantity of the services to be required :

１．Management of creation processing of electronic image data of paper account books 1 set

２．Development of electronic image data of Employees' Pension record books and their index data (section 2) 1 set

３．Development of electronic image data of Employees' Pension record books and their index data (section 4) 1 set

４．Development of electronic image data of Employees' Pension record books and their index data (section 5) 1 set

５．Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 1) 1 set

６．Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 2) 1 set

７．Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 3) 1 set

８．Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 4) 1 set

９．Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 5) 1 set

10. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 6) 1 set

11. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 7) 1 set

12. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 8) 1 set

13. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 9) 1 set

14. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 10) 1 set

15. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 11) 1 set

16. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 12) 1 set

17. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 13) 1 set

18. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 14) 1 set

19. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 15) 1 set

20. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 16) 1 set

21. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 17) 1 set

22. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 18) 1 set

23. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 19) 1 set

24. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 20) 1 set

25. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 21) 1 set

26. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 22) 1 set

27. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 23) 1 set

28. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 24) 1 set

29. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 25) 1 set

30. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 26) 1 set

31. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 27) 1 set

32. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 28) 1 set

33. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 29) 1 set

34. Data input to the record on the insured persons under the Employees' Pension System (Data integration) (Section 30) 1 set

35. Data storage : General Pension Information Management and Collation System (a paper account book search system) 1 set

36. System development of General Pension Information Management and Collation System (a paper account book search system), associated with the change of operating season. 1 set

37. Addition of functions to General Pension Information Management and Collation System (a paper account book search system) 1 set
