3　説明書の交付　本公表に基づき応募する供給者に対して導入説明書を交付する。
⑴　交付期間　平成24年５月11日から平成24年６月11日まで。
⑵　交付場所　上記２⑵に同じ。
4　説明会の開催　本公表に基づく導入説明会を開催する。
⑴　開催日時　平成24年５月18日15時30分
⑵　開催場所　九州工業大学　情報工学部研究管理棟テレビ会議室
5　その他　この導入計画の詳細は導入説明書による。なお、本公表内容は予定であり、変更することがあり得る。
6　Summary
⑴　Classification of the products to be procured : 14
⑵　Nature and quantity of the products to be rent : Computer System for Education in Advanced Computer Engineering (Department of Bioscience and Bioinformatics) 1 Set
⑶　Type of the procurement : Rent
⑷　Basic requirements of the procurement :
A　The education subsystem consists of personal computers (PCs) that can run UNIX compatible operating system (OS) and Windows OS via dual boot system. The total number of the PCs is around 70. They are split into 3 groups with 40, 20 and 10 PCs, respectively, and need to be runsimultaneously during a class. The system also requires the following functions and equipments :
(a)　The settings of the PCs can be renewed and recovered automatically.
(b)　The PCs and displays should be small enough to be fit to our limited space, and their energy consumption should be saved.
(c)　The PCs must be connected to the network. Printers should also be provided and available through the network.
B　The research subsystem consists of high-spec computation servers and file servers that can handle large scale data. Both servers must be operated under UNIX compatible OS. These servers must be ready to perform multipurpose graduate-level education. This system also requires the following functions and equipments :
(a)　High-spec computation servers possesses source-code level compatibility with the above mentioned education subsystem.
(b)　High-spec computation servers can run software suitable for performing education and research in bioinformatics.
(c)　File servers should be available from the above mentioned education subsystem via remote-mount.
C　The laboratory subsystem consists of PCs that can run UNIX compatible OS and peripheral equipments such as printers. This system must be flexibly used for various research purposes such as programming and data analysis.
D　The network management subsystem consists of a main switch and two or more sub-switches, and a server group for network management (DNS, mail, WWW, software license). These switches and servers should be connected with high-speed LAN. The subsystem should have the following functions and equipments :
(a)　The system should manage the users of the education subsystem and the research subsystem.
(b)　The terminal information in the education subsystem and the research subsystem should be collected and managed.
(c)　The major appliances should have redundancy such as duplication.
(d)　The system should have security countermeasure functions, such as DMZ, anti virus, and anti SPAM.
E　The software which are used for education and research of the department, programming languages and their development environment, various utilities, applications (Genetyx, MOE), etc. should be provided. In addition, these software should be upgraded appropriately. The free software currently used widely should work on the system.
F　The target system should be connected with the Kyushu Institute of Technology integrated ID management system, and acquire information required for authentification of the system.
G　Energy saving, laborsaving, and space saving should be considered from the viewpoint of management and operation of the target system.
H　The target system should be stable, and should provide functions of dealing with a trouble situation quickly and locally.
⑸　Time limit for the submission of the requested material : 5 : 00 PM 11, June, 2012
⑹　Contact point for the notice : Kazutaka Takahashi, Procurement Section, Accounting Division, Kyushu Institute of Technology, 1―1 Sensui-cho Tobata-ku Kitakyushu-shi 804―8550 Japan, TEL 093―884―3029
