② office building(s) of at least 15,000 ㎡ or larger total floor space and assembly hall(s) as the main contractor for more than one year in the past three years.

I have facilities watching and maintenance work with watching facilities central control system which

① The distant place surveillance center should be a function which are their company property and a their company employee carries out management, and enables always-on connection and the all-points surveillance of the central monitor and control of an exchange hall, and the function more than equivalent.

Moreover, share the contents which performed information, including a nearby base, an alarm, etc., and urgent correspondence, and have a function which outputs the data for analysis if needed.

② The distant place surveillance center should have the equipment in which continuation of surveillance is possible also at the time of an electric supply company power failure, and should have a dynamo in which electric supply is possible, and a fuel storage facility for 100 % of distant place surveillance center functions about emergency-power-generating equipment for 24 hours or more.

③ A distant place surveillance center is considered as the central monitor and control of an exchange hall, and on-line double connection (when an obstacle should usually occur in the communications network at the time). It be possible to perform remote supervision business, such as what is automatically changed to the communications network of backup, surveillance and control and measurement／starting operation／stop operation／setting change／schedule change operating system performance diagnostics.

④ When you have an urgent mobilization center and an alarm occurs by failure of apparatus, abnormalities, etc., dispatch two or more engineers to an exchange hall within 60 minutes, and perform the emergency measure of the part concerned.

Cover with urgent organization also on a-holiday for 24 hours especially in the night.

※submit the documents (a style arbitrary) which indicated the outline of the monitoring instrument which writes in a plan in order to prove filling above-mentioned ①～④, and makes distant place surveillance connection collectively.

Moreover, supplement with explanation with a corporate guidebook etc. if needed.

J possess a certification of ISO14000S and ISO9000S as Facility Operation & Maintenance Service and Cleaning service.

K possess a certification of Security Services Act

L A trustee needs to carry out about performing-a-task management.

When you re-entrust a part of business, write the reason for a re-commissioned business name, a re-consignee, and re-commission in a plan. Moreover, when you ask for the documents etc. which need this mechanism for grasp of the fulfillment organization of a re-consignee, prepare the organizations which can respond.

M A trustee is supposing that the arrangement which reports an operating enforcement situation and future order of business periodically is performed so that each business's can carry out efficiently, and reporting the result.

N It is supposed that business is carried out, a trustee performing liaison and adjustment as closely as the basis and "Tokyo international exchange hall foreign student and researcher lodgings management／management operating" trustee of management and instruction of JASSO, and a "management operating, such as Tokyo international exchange hall plaza Heisei meeting facilities," trustee, Place principal contacts with the service operating (waste treatment business etc.) trustee for whom JASSO places an order separately, and bear the business which directs and manages each operating trustee.
