2. Each Party shall make publicly available the current state of allocated frequency bands, but shall not be required to provide detailed identification of frequencies allocated for specific government uses.

3. A Party's measures allocating and assigning spectrum and managing frequency are not measures that are *per se* inconsistent with Article 7.5. Accordingly, each Party retains the right to establish and apply spectrum and frequency management policies that have the effect of limiting the number of suppliers of public telecommunications transport networks or services, provided that it does so in a manner consistent with other provisions of this Agreement, especially Article 7.3. Such right includes the ability to allocate frequency bands, taking into account current and future needs and spectrum availability.

Article 11
Transparency

Each Party shall ensure that its measures related to access to and use of public telecommunications transport networks and services are made publicly available, including measures related to:

(a) tariffs and other terms and conditions of service;

(b) specifications of technical interfaces;

(c) bodies responsible for the preparation, amendment and adoption of standards affecting such access and use;

(d) conditions applying to attachment of terminal or other equipment to the public telecommunications transport networks; and

(e) notifications, registration or licensing requirements, if any.

Article 12
Settlement of Telecommunications Disputes

1. Each Party shall ensure that suppliers of public telecommunications transport networks or services of the other Party may have timely recourse to its telecommunications regulatory body or dispute settlement body to settle disputes in accordance with its laws and regulations.

2. Each Party shall ensure, in accordance with its laws and regulations, that any supplier of public telecommunications transport networks or services aggrieved by a determination or decision of its relevant telecommunications regulatory body may petition that body for reconsideration of that determination or decision. Neither Party shall permit such a petition to constitute grounds for non-compliance with such determination or decision of the said body unless an appropriate authority suspends or withdraws such determination or decision.

3. Each Party shall ensure that any supplier of public telecommunications transport networks or services aggrieved by a final determination or decision of its relevant telecommunications regulatory body may obtain judicial review of such determination or decision by an independent judicial authority. Neither Party shall permit such review to constitute grounds for non-compliance with such determination or decision of the said body unless the relevant judicial authority withholds, suspends or repeals such determination or decision.

Article 13
Relation to International Organizations

The Parties recognize the importance of international standards for global compatibility and inter-operability of telecommunications networks and services, and undertake to promote such standards through the work of relevant international bodies, including the International Telecommunication Union and the International Organization for Standardization.
