Electricity to use in Kamishiro tunnel transformer substation, contract power : 68kW The estimated electricity consumption for the delivery period : 450,000kWh

Electricity to use in Muroran interchange transformer substation, contract power : 148kW The estimated electricity consumption for the delivery period : 1,340,000kWh

Electricity to use in Usuzan service area transformer substation, contract power : 166kW The estimated electricity consumption for the delivery period : 1,550,000kWh

Electricity to use in Toya tunnel transformer substation, contract power : 72kW The estimated electricity consumption for the delivery period : 550,000kWh

Electricity to use in Abutatoyako interchange transformer substation, contract power : 59kW The estimated electricity consumption for the delivery period : 480,000kWh

Electricity to use in Aoba tunnel transformer substation, contract power : 89kW The estimated electricity consumption for the delivery period : 550,000kWh

Electricity to use in Shinonome tunnel transformer substation, contract power : 99kW The estimated electricity consumption for the delivery period : 740,000kWh

Electricity to use in Toyoura tunnel transformer substation, contract power : 65kW The estimated electricity consumption for the delivery period : 510,000kWh

Electricity to use in Takaoka tunnel transformer substation, contract power : 75kW The estimated electricity consumption for the delivery period : 640,000kWh

Electricity to use in Toyoura interchange transformer substation, contract power : 67kW The estimated electricity consumption for the delivery period : 550,000kWh

Electricity to use in Kanayama tunnel transformer substation, contract power : 193kW The estimated electricity consumption for the delivery period : 1,100,000kWh

Electricity to use in Kuromatsunai junction transformer substation, contract power : 64kW The estimated electricity consumption for the delivery period : 540,000kWh

Electricity to use in Oshamanbe interchange transformer substation, contract power : 80kW The estimated electricity consumption for the delivery period : 680,000kWh

Electricity to use in Otoshibe interchange transformer substation, contract power : 53kW The estimated electricity consumption for the delivery period : 460,000kWh

Electricity to use in Yakumo tunnel transformer substation, contract power : 48kW The estimated electricity consumption for the delivery period : 280,000kWh

Electricity to use in Mori tunnel transformer substation, contract power : 43kW The estimated electricity consumption for the delivery period : 260,000kWh

Electricity to use in Mori interchange transformer substation, contract power : 68kW The estimated electricity consumption for the delivery period : 530,000kWh

Electricity to use in Onumakoen interchange transformer substation, contract power : 48kW The estimated electricity consumption for the delivery period : 410,000kWh

② Electricity to use in Tomakomai-higashi interchange transformer substation, contract power : 134kW The estimated electricity consumption for the delivery period : 1,210,000kWh

Electricity to use in Tomakomainishi interchange transformer substation, contract power : 111kW The estimated electricity consumption for the delivery period : 1,030,000kWh

Electricity to use in Tarumae service area transformer substation, contract power : 108kW The estimated electricity consumption for the delivery period : 1,110,000kWh

Electricity to use in Shiraoiporoto tunnel transformer substation, contract power : 290kW The estimated electricity consumption for the delivery period : 1,240,000kWh

Electricity to use in Hagino parking area transformer substation, contract power : 33kW The estimated electricity consumption for the delivery period : 240,000kWh

Electricity to use in Kojohama tunnel transformer substation, contract power : 133kW The estimated electricity consumption for the delivery period : 690,000kWh

Electricity to use in Noboribetsu-higashi interchange transformer substation, contract power : 86kW The estimated electricity consumption for the delivery period : 680,000kWh

Electricity to use in Horobetsu tunnel transformer substation, contract power : 128kW The estimated electricity consumption for the delivery period : 670,000kWh

Electricity to use in Noboribetsu-muroran interchange transformer substation, contract power : 72kW The estimated electricity consumption for the delivery period : 630,000kWh

③ Electricity to use in Sapporo interchange transformer substation, contract power : 196kW The estimated electricity consumption for the delivery period : 1,640,000kWh

Electricity to use in Sapporominami interchange transformer substation, contract power : 201kW The estimated electricity consumption for the delivery period : 1,830,000kWh

Electricity to use in Kitahiroshima interchange transformer substation, contract power : 176kW The estimated electricity consumption for the delivery period : 1,600,000kWh

Electricity to use in Wattsu parking area transformer substation, contract power : 408kW The estimated electricity consumption for the delivery period : 3,380,000kWh

Electricity to use in Chitoseeniwa junction transformer substation, contract power : 42kW The estimated electricity consumption for the delivery period : 250,000kWh

Electricity to use in Chitose interchange transformer substation, contract power : 90kW The estimated electricity consumption for the delivery period : 820,000kWh

Electricity to use in New Chitose Airport interchange transformer substation, contract power : 62kW The estimated electricity consumption for the delivery period : 430,000kWh

Electricity to use in Kariki interchange transformer substation, contract power : 51kW The estimated electricity consumption for the delivery period : 380,000kWh

Electricity to use in Sapporokita interchange second transformer substation, contract power : 56kW The estimated electricity consumption for the delivery period : 440,000kWh

Electricity to use in Sapporonishi interchange transformer substation, contract power : 81kW The estimated electricity consumption for the delivery period : 700,000kWh

Electricity to use in Zenibako interchange transformer substation, contract power : 73kW The estimated electricity consumption for the delivery period : 600,000kWh
