ARTICLE 7.10

Market surveillance

1. For the purposes of this Article, "market surveillance" is a public authority function separate from and carried out after conformity assessment procedures, and means activities conducted and measures taken by public authorities on the basis of procedures of a Party to enable that Party to monitor or address compliance of products with the requirements set out in its laws and regulations.

2. Each Party shall, *inter alia*:

(a) exchange information with the other Party on market surveillance and enforcement activities, for example on the authorities responsible for market surveillance and enforcement, or on measures taken against dangerous products;

(b) ensure the independence of market surveillance functions from conformity assessment functions with a view to avoiding conflicts of interest;[1] and

(c) ensure that there are no conflicts of interest between market surveillance authorities and the persons concerned, subject to control or supervision, including the manufacturer, the importer and the distributor.

[1] For greater certainty, this subparagraph does not apply to authorisation functions performed by a Party itself when it retains the final decision-making authority regarding the conformity of a product. A Party may comply with this obligation by means of separation of market surveillance authorities from conformity assessment bodies.
