Sector or Subsector	Conditions and Limitations
COMMUNICATIONS SERVICES **Telecommunication services**	
Basic telecommunication Based on domestic regulations, Malaysia has reclassified its communications services sector on the basis of provision of services by Network Service Provider (NSP) and Applications Service Provider (ASP). Basic local, inter-exchange, and international services; supplied over public telecommunications transport networks using any network technology; facilities regardless of whether the means of delivery services are wired or wireless are mapped into the aforementioned three categories.	Unbound except as indicated in the Horizontal Commitments.
Value-added services Telecommunication services of which enhanced value-added services must be provided from channels or lines obtained only from licensed Network Facilities Provider Individual Licence (NFP(I)) and Network Service Provider Individual Licence (NSP(I)) operators and are also mapped into the three Class Licence categories below: (a) NFP(C)[1]; (b) NSP(C)[2]; and (c) ASP(C)[3].	Unbound except as indicated in the Horizontal Commitments.
CONSTRUCTION SERVICES	
Pre-erection work at construction site (CPC 511)	Unbound except as indicated in the Horizontal Commitments.
Construction work for buildings (CPC 512)	Unbound except as indicated in the Horizontal Commitments.
Construction work for civil engineering (CPC 513)	Unbound except as indicated in the Horizontal Commitments.

[1] The NFP class licence enables the provision of niched or limited purpose network facilities such as radio communications transmitters for public mobile radio network services, radio communications transmitters for public radio paging network services, and radio communications transmitters and links for public wireless data network services, for the sole purpose of end users in buildings or a single clustered building complex.

[2] The NSP class licence enables the provision of niched customer access or niched connection services such as public mobile radio work services, one or two-way radio paging network services, radio communications transmitters for public radio paging network services, and radio communications transmitters and links for public wireless data network services, for the sole purpose of end users in buildings or a single clustered building complex.

[3] The ASP class licence enables the provision of application services such as audio text hosting services provided on an opt-in basis, directory services, and messaging services.
