Electricity to use in Tohoku Expressway, Takizawa IC electric receiving place, contract power : 79kW the estimated electricity consumption for the delivery period : 1,000,000kWh

Electricity to use in Tohoku Expressway, Nishine IC electric receiving place, contract power : 98kW the estimated electricity consumption for the delivery period : 1,100,000kWh

Electricity to use in Tohoku Expressway, Iwatesan SA electric receiving place, contract power : 251kW the estimated electricity consumption for the delivery period : 4,000,000kWh

Electricity to use in Tohoku Expressway, Matsuohachimantai IC electric receiving place, contract power : 65kW the estimated electricity consumption for the delivery period : 870,000kWh

Electricity to use in Tohoku Expressway, Ryugamori Tunnel electric receiving place, contract power : 162kW the estimated electricity consumption for the delivery period : 2,300,000kWh

Electricity to use in Tohoku Expressway, Hata PA electric receiving place, contract power : 28kW the estimated electricity consumption for the delivery period : 360,000kWh

Electricity to use in Tohoku Expressway, Hodosaka Tunnel electric receiving place, contract power : 101kW the estimated electricity consumption for the delivery period : 850,000kWh

Electricity to use in Hachinohe Expressway, Ashiro JCT electric receiving place, contract power : 32kW the estimated electricity consumption for the delivery period : 340,000kWh

Electricity to use in Tohoku Expressway, Ashiro IC electric receiving place, contract power : 118kW the estimated electricity consumption for the delivery period : 1,200,000kWh

Electricity to use in Hachinohe Expressway, Joboji IC electric receiving place, contract power : 67kW the estimated electricity consumption for the delivery period : 840,000kWh

Electricity to use in Tohoku Expressway, Takizawachuo SIC electric receiving place, contract power : 83kW the estimated electricity consumption for the delivery period : 570,000kWh

Electricity to use in Tohoku Expressway, Ichinoseki IC electric receiving place, contract power : 76kW the estimated electricity consumption for the delivery period : 970,000kWh

Electricity to use in Tohoku Expressway, Ichinoseki Tunnel electric receiving place, contract power : 116kW the estimated electricity consumption for the delivery period : 1,200,000kWh

Electricity to use in Tohoku Expressway, Hiraizumi Tunnel electric receiving place, contract power : 126kW the estimated electricity consumption for the delivery period : 1,400,000kWh

Electricity to use in Tohoku Expressway, Hiraizumimaesawa IC electric receiving place, contract power : 71kW the estimated electricity consumption for the delivery period : 880,000kWh

Electricity to use in Tohoku Expressway, Maesawa SA electric receiving place, contract power : 252kW the estimated electricity consumption for the delivery period : 3,700,000kWh

Electricity to use in Tohoku Expressway, Mizusawa IC electric receiving place, contract power : 80kW the estimated electricity consumption for the delivery period : 970,000kWh

Electricity to use in Tohoku Expressway, Kitakamikanegasaki IC electric receiving place, contract power : 76kW the estimated electricity consumption for the delivery period : 1,100,000kWh

Electricity to use in Tohoku Expressway, Kitakamiezuriko IC electric receiving place, contract power : 169kW the estimated electricity consumption for the delivery period : 2,100,000kWh

Electricity to use in Tohoku Expressway, Hanamaki PA electric receiving place, contract power : 27kW the estimated electricity consumption for the delivery period : 390,000kWh

Electricity to use in Tohoku Expressway, Hanamakiminami IC electric receiving place, contract power : 58kW the estimated electricity consumption for the delivery period : 720,000kWh

Electricity to use in Akita Expressway, Kitakami JCT electric receiving place, contract power : 34kW the estimated electricity consumption for the delivery period : 290,000kWh

Electricity to use in Akita Expressway, Kitakaminishi IC electric receiving place, contract power : 76kW the estimated electricity consumption for the delivery period : 930,000kWh

Electricity to use in Akita Expressway, Yamaguchi Tunnel electric receiving place, contract power : 56kW the estimated electricity consumption for the delivery period : 340,000kWh

Electricity to use in Akita Expressway, Wagasennin Tunnel electric receiving place, contract power : 589kW the estimated electricity consumption for the delivery period : 2,100,000kWh

Electricity to use in Akita Expressway, Togeyama Tunnel electric receiving place, contract power : 231kW the estimated electricity consumption for the delivery period : 980,000kWh

Electricity to use in Akita Expressway, Kinshuko SA electric receiving place, contract power : 76kW the estimated electricity consumption for the delivery period : 1,100,000kWh

Electricity to use in Akita Expressway, Yuda Tunnel electric receiving place, contract power : 173kW the estimated electricity consumption for the delivery period : 1,800,000kWh

Electricity to use in Akita Expressway, Kawajiri Tunnel electric receiving place, contract power : 57kW the estimated electricity consumption for the delivery period : 430,000kWh

Electricity to use in Akita Expressway, Yuda IC electric receiving place, contract power : 74kW the estimated electricity consumption for the delivery period : 900,000kWh

Electricity to use in Kamaishi Expressway, Hanamaki JCT electric receiving place, contract power : 25kW the estimated electricity consumption for the delivery period : 270,000kWh

Electricity to use in Kamaishi Expressway, HanamakiAirport IC electric receiving place, contract power : 53kW the estimated electricity consumption for the delivery period : 640,000kWh

Electricity to use in Kamaishi Expressway, HanamakiAirport TB electric receiving place, contract power : 46kW the estimated electricity consumption for the delivery period : 420,000kWh

Electricity to use in Kamaishi Expressway, Towa IC electric receiving place, contract power : 22kW the estimated electricity consumption for the delivery period : 190,000kWh

Electricity to use in Tohoku Expressway, Shiroishi IC electric receiving place, contract power : 59kW the estimated electricity consumption for the delivery period : 800,000kWh

Electricity to use in Tohoku Expressway, Murata IC electric receiving place, contract power : 44kW the estimated electricity consumption for the delivery period : 600,000kWh
