2　資料及びコメントの提供方法　上記１⑵の物品に関する一般的な参考資料及び同⑸の要求要件等に関するコメント並びに提供可能なライブラリーに関する資料等の提供を招請する。
⑴　資料等の提供期限　令和５年10月27日17時00分（郵送の場合は必着のこと。）
⑵　提供先　〒431―3192　浜松市東区半田山１―20―１　浜松医科大学会計課　和田　哲明　電話053―435―2553
3　説明書の交付　本公表に基づき応募する供給者に対して導入説明書を交付する。
⑴　交付期間　令和５年９月11日から令和５年10月27日まで。
⑵　交付場所　上記２⑵に同じ。
4　説明会の開催　本公表に基づく導入説明会を開催する。
⑴　開催日時　令和５年９月15日14時00分
⑵　開催場所　浜松医科大学管理棟２階第二会議室
5　その他　この導入計画の詳細は導入説明書による。なお、本公表内容は予定であり、変更することがあり得る。
6　Summary
⑴　Classification of the products to be procured : 14
⑵　Nature and quantity of the products to be purchased : Information and Communication System for the university 1 Set
⑶　Type of the procurement : Rent
⑷　Basic requirements of the procurement :
A　This system shall consist of various servers, terminal computers, and other related equipment. The main items follows. DNS servers, Email servers for monitoring notifications, statistical processing software license servers, genetic information processing software license servers, authentication servers, thin client systems (VDI, Thin Provision), Active Directory servers, file servers, backup servers, IC card identification issuance systems and collaborating Active Directory account creation systems, edge routers, firewalls, L3 core switches.
B　It is desirable that Configuration can restrict not only external communications, but also communications within the university according to network policy and detect unknown viruses.
C　This university uses Microsoft 365 A1. The Azure Active Directory and on-campus AD information shall be securely synchronized.
D　In the next system, we plan to change the ID that uniquely identify users (staff and students). But it is necessary to continue using the current email address (it does not have to be the same as the ID). So that, bidder must have advanced knowledge of AD, Microsoft 365, LDAP, GakuNin. And should indicate an example of that achievement.
E　It is desirable to have support operation and maintenance experience for Microsoft 365.
F　When using services on the cloud, actively utilize multi-factor authentication by Azure. However, SSO is not mandatory.
G　Include a function to check vulnerabilities in various servers including servers not procured.
H　Include a commissioned service by remote for network monitoring and maintenance to detect unauthorized entry.
I　Include a management tools to collect and search event logs／syslog／SNMP traps, etc, on servers and network devices.
J　Include an operation management tool that enables to grasp the presence or absence of failures and resources. It is desirable that devices outside this procurement can be included in the management target.
K　The thin client system should adopt the screen transfer method. And it is desirable that the process between terminal power-on and login completion of the thin client system is complete within a minute.
L　Thin client terminals that placed at computer training room shall support the medical faculty Common examinations (CBT).
M　Provide a wireless network system that spreads the entire campus.
N　There are some network problems (unstable, disconnected) whether wired or wireless. Should troubleshoot with advanced technology even in non-reproducible situations. Indicate the project structure and ingenuity for that, including past achievements.
O　Provide an incident management (ticket management) function to avoid a discrepancy of recognition between the University and bidders. Should attachments can be previewed, and desirable that mobile app is provided.
P　Suggest a network authentication method that can restrict to only devices used by regular users when a connection to the campus network is attempted by devices outside this procurement. Instead of “Captive Portal”.
Q　Indicate the internet route, maintenance route, location of firewall placement, bottleneck, cost, etc. when built in a cloud. It does not matter assume the cost with sample case.
R　The system performance initially expected has not been achieved, such as the setting mistakes at the time of construction were newly exposed and the taking measures. Indicate the project structure and ingenuity to minimize troubles during construction, including past achievements.
S　It is a major premise of stable operation to provide a support structure that is capable of preventing system failures and capable of taking prompt action when a failure actually occurs. Indicate the project structure and ingenuity for that, including past achievements.
T　We have a hard time that the information of “vulnerabilities”, “version upgrades”, “end-of-support” from venders is not provided timely. To improve that, indicate the project structure and ingenuity, including past achievements.
⑸　Time limit for the submission of the requested material : 17 : 00　27 October, 2023
⑹　Contact point for the notice : Wada Tetsuaki, Accounting Division, Hamamatsu University School of Medicine, 1―20―1 Handayama Higashi-ku Hamamatsu-shi 431―3192 Japan, TEL 053―435―2553

資料提供招請に関する公表

次のとおり物品の導入を予定していますので、当該導入に関して資料等の提供を招請します。
令和５年９月11日
国立大学法人大阪大学総長　西尾章治郎
◎調達機関番号　415　◎所在地番号　27
○第８号
1　調達内容
⑴　品目分類番号　22、31
⑵　導入計画物品及び数量　手術用冷蔵庫・冷凍庫　22式
⑶　調達方法　購入
⑷　導入予定時期　令和７年２月以降
⑸　調達に必要とされる基本的な要求要件
A　手術室の壁面内に設置できること。
B　温度異常発生時に、ランプ、ブザー等でのアラーム機能がついていること。
C　輸血用血液製剤専用であること。
D　温度管理センサーが設置できること。
2　資料及びコメントの提供方法　上記１⑵の物品に関する一般的な参考資料及び同⑸の要求要件等に関するコメント並びに提供可能なライブラリーに関する資料等の提供を招請する。
⑴　資料等の提供期限　令和５年10月27日17時15分（郵送の場合は必着のこと。）
⑵　提供先　〒565―0871　大阪府吹田市山田丘２―15　大阪大学医学部附属病院再開発企画整備室調達係　吉弘　周平　電話06―6879―5339
